

# 2000 KENTUCKY ANNUAL LONG-TERM CARE REPORT

## INTRODUCTION

The Health Policy Development Branch of the Division of Epidemiology and Health planning announces the release of the 2000 Kentucky Annual Long-Term Care Report. This branch, established in July 1996, is responsible for utilization data collection and reporting required by 902 KAR 20:008.

This report covers the period from January 1, 2000 to December 31, 2000, for all facilities in compliance with licensing and regulation reporting requirements. Several facilities failed to report any data for this survey period. See “Notes” section at the end of this report.

Data in this report is organized by Area Development Districts (ADDs) and county where each facility is located.

The definitions of terms in this report are:

**Long-Term Care:**

A facility licensed by the state through the Division of Licensing and Regulation providing one or more of the following levels of care:

**Nursing Facility (NF)** - Long-term care facilities, formerly skilled nursing, nursing home, or intermediate care facilities prior to October 1, 1990, which meet the Omnibus Budget Reconciliation Act of 1987 (OBRA 87) nursing home reform requirements.

Nursing facilities must be certified to participate in the Medicare program in order to be certified for participation in Medicaid, with the exception of those who have obtained a Medicaid nursing requirement waiver.

**Skilled Nursing (SN)** - Establishments with medical staffs and permanent facilities that include inpatient beds, and with medical services, including physician services and continuous nursing services; that provide treatment for patients who require inpatient care but are not in an acute phase of illness and who currently require primarily convalescent or restorative services, and who have a variety of medical conditions.

**Nursing Home (NH)** - Establishments with permanent facilities that include inpatient beds, and with medical services including continuous nursing service; that provide treatment for patients who require inpatient care but do not currently require continuous hospital services.

**Intermediate Care (IC)** - Establishments with permanent facilities and health related services for patients who do not require the degree of care and treatment which a hospital or skilled nursing facility is designed to provide, but who, because of their mental or physical condition, require care and services (above the level of room and board) which can be made available to them only through institutional facilities on an inpatient basis.

**Alzheimer's Facility (ALZ)** - A long term care facility constructed and operated pursuant to KRS.216B.071 which provides care to residents with a primary diagnosis of Alzheimer's disease or related disorders.

**Intermediate Care Facility for the Mentally Retarded (ICF/MR)** - A facility licensed by the state through the Division of Licensing and Regulation to provide care for the mentally retarded and developmentally disabled.

**Total Patient Days:**

Sum of daily patient census.

**Days in Period:**

2000 had 366 days.

**Licensed Beds:**

Number and type of beds for which the facility has been licensed at the end of the reporting period.

**Percent Occupancy:**

Total days divided by potential patient days.

**Potential Patient Days:**

Number of licensed beds x the number of days in the reporting period (adjusted to reflect changes in licensed beds during the reporting period). This figure is not shown in the report but used to calculate occupancy percentages.

**Reporting Period:**

January 1, 2000 to December 31, 2000

**Nursing Facility Special Note:** If a facility converted Skilled Nursing (SN), Nursing Home (NH), or Intermediate Care (IC) beds to NF beds during this reporting period, all resident activity in these beds was considered to be NF for the entire period regardless of the date of the change.

**This report now becomes the official data on long-term care utilization published by the Cabinet for Health Services.**

## **Data Analysis - Occupancy Rates**

The following table and graphs present statistics from the Kentucky Annual Long-Term Care Reports from 1995 to 2000. In the published reports for 1996 and 1997, the data was reported in Medicaid Managed Care Partnership Regions (MCPR) rather than in Area Development Districts (ADDs) as they were in 1995, and from 1998 through 2000. The data extracted from the 1996 and 1997 reports was recalculated using the ADDs rather than the MCPR regions so that a comparison could be made across these years. A map of the ADDs is included at the end of this section.

The occupancy rate for licensed Nursing Facility beds has decreased over the past six (6) years by 2.24% from 95% in 1995 to 92.76% in . The following chart shows the decrease in occupancy for the last six (6) years. The decline was continuous from 1995 through 1998 with a very small increase in 1999 (.05%) which is likely not statistically significant. From 1999 to 2000, the occupancy rate for NF beds dropped .84%. The following table shows data for each year by ADD. From 1995 to 2000, occupancy fell in all but three (3) of the fifteen (15) ADDs and a chart shows a graphical interpretation of the data.

The decline in occupancy ranged from .36% to 7.95%. The three (3) ADDs that did show an increase in occupancy rose by 1.83% in the Lake Cumberland ADD, by .68% in the Bluegrass ADD and by 4.36% in the FIVCO ADD. However, in the FIVCO and Bluegrass ADDs, the occupancy for 2000 both fell from the 1999 rate indicating that the increase in occupancy has not resulted in a nursing facility bed shortage in that area.

The occupancy rates for Personal Care beds has increased by .08% within this six (6) year time period, however, the rate fell 5.36% from 1999 to 2000. The occupancy rates for licensed Skilled Nursing beds, licensed Intermediate Care beds and licensed Nursing Home beds has also increased over the past six (6) years. The highest occupancy rates in 2000 were seen in the Intermediate Care beds with a rate of 98.27% and the lowest was in the Personal Care beds at 76.18%. In 1995 Personal Care bed occupancy was only 76.10%. Further data on the occupancy rates by bed type are presented on the following table.
